Suitable for	Lada - Lada Niva - 3 door

Sliding window

The sliding windows are completely consistent with the original dimensions of your side window, so these can be installed easily and quickly.

The sliding part of the window is mounted in a specifically developed sliding system, which makes it immune to the accumulation of dirt in the slide channel. It is a system we are using for more than 20 years in the coachbuilding industry and it guarantees long-term low maintenance.

The sliding window from Explore Glazing is fitted with an easily operated lock mechanism and is adjustable in various positions. The edges of the glass are polished for optimum performance and safety.

The sliding windows are fitted with 4 mm toughened safety glass, certified ECE R-43 and DOT, and available in privacy grey, light transmission 20% (tinted 80%).

Available for the left and right side. Windows are not interchangeable.

The sliding windows can be expanded with a window guard or with an Explore Overlander Light.

Installation

General

- The dimensions of the windows fully correspond to the original side window glasses.
- No adjustments to the bodywork are necessary, so that the original side window glasses can be replaced if necessary.
- Easy and quick to assemble.

Both the sliding windows and the gullwings are mounted in the original window rubber.

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a skilled company.
