Dimensions	Width: 690mm Height: 430mm
Suitable for	Land Rover - Land Rover Defender 90 - 110 Land Rover - Land Rover Defender Hard Top 110 3-door

Add-on: internal Molle-system for the tail door halfdrop window

The tail door halfdrop window for Land Rover Defender features a Molle panel that is mounted onto the window, allowing easy access to the locks. This design maximizes the window space for attaching bags or pouches using the well-known PALS webbing system, while allowing smooth opening and closing of the window.

No permanent holes are made in the tail door, ensuring that it can always be returned to its original state if desired.

The internal Molle panel is made of 3 mm thick aluminum, with a matching industrial powder coating as the window. It is equipped with the PALS webbing pattern and has \varnothing 4.2 mm holes between the pattern, allowing compatibility with other systems such as Quick Fist.

This versatile system also serves as burglary protection due to its smart mounting design.

Installation

Mounting screws (stainless steel), cover caps and washers are included.

The required mounting set consists of the following components:

- 4.2 mm drill
- 5.0 mm drill
- M5 tap
- Tamper-resistant Torx bit

The mounting set is included as a standard with your quotation request.

For detailed installation instructions, please download our installation guide.
