Land Rover Defender - Quarter window gullwing

The quarter gullwing window offers a seamless replacement for the original quarter glass of your Land Rover Defender, maintaining the same dimensions for a hassle-free installation process.

Crafted with precision and durability in mind, the quarter gullwing window features a sturdy 4 mm aluminum plate, providing robustness and longevity. It is equipped with a reliable gas spring and a lockable compression latch, ensuring a secure and tight seal when closed.

For added convenience, the quarter gullwing window utilizes the same latch as our other gullwing windows, allowing for the use of a single key across all gullwing windows when ordered together. Please note that if you already have a gullwing window and subsequently order the quarter gullwing window separately, it may not be possible to provide the same key number.

To maintain a sleek and consistent aesthetic, the entire window, including the frame and hinged part, is coated with a high-quality black industrial powder coating (RAL 9005). This coating not only enhances the visual appeal of the window but also protects it from discoloration caused by various weather conditions.

Upgrade your Land Rover Defender with the quarter gullwing window, designed for both functionality and longevity. Experience the ease of installation, enhanced security features, and cohesive design that seamlessly integrates with your vehicle's aesthetics. Enjoy peace of mind, knowing that your quarter gullwing window is built to withstand the test of time and weather.

Installation

General

- The dimensions of the window fully correspond to the original quarter glass of your Land Rover Defender.
- No adjustments to the bodywork are necessary, which means that the original window can easily be replaced.
- Easy and quick to assemble.

The quarter window is mounted with M4*16 stainless steel mounting screws and sealed with adhesive.

For an additional charge, the stainless steel mounting screws can be supplied black powder coated. This option will be offered to you as standard.

A mounting set will be offered with your request and consists of:

- drill 4.2 mm
- cartridge of Dowsil 791 Silicone Weatherproofing
- brush
- rubber to remove the excess sealant
