Suitable for	Mercedes-Benz - Mercedes Kastenwagen

Sliding window

The sliding windows are completely consistent with the original dimensions of your side window, so these can be installed easily and quickly.

The sliding part of the window is mounted in a specifically developed sliding system, which makes it immune to the accumulation of dirt in the slide channel. It is a system we are using for more than 20 years in the coachbuilding industry and it guarantees long-term low maintenance.

The sliding window from Explore Glazing is fitted with an easily operated lock mechanism and is adjustable in various positions. The edges of the glass are polished for optimum performance and safety.

The sliding windows are fitted with 4 mm toughened safety glass, certified ECE R-43 and DOT, and available in privacy grey, light transmission 20% (tinted 80%).

Available for the left and right side. Windows are not interchangeable.

The sliding windows can be expanded with a window guard.

Installation

General

- The dimensions of the window fully correspond to the original window.
- No adjustments to the bodywork are necessary, which means that the original window can easily be replaced.
- Easy and quick to assemble.

The gullwing window is mounted with M4*20 stainless steel mounting screws and sealed with adhesive.

For an additional charge, the stainless steel mounting screws can be supplied black powder coated. This option will be offered to you as standard.

A mounting set will be offered with your request and consists of:

- drill 4.2 mm
- cartridge of professional sealant
- brush
- rubber to remove the excess sealant

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a professional company.
