Price	Price starts from €340,-
Dimensions	Width: 888mm Height: 487mm
Suitable for	Mercedes-Benz - Mercedes G-Class LWB 5-door Mercedes-Benz - Mercedes G-Class SWB 3-door Mercedes-Benz - Mercedes Kastenwagen

Tail door halfdrop window

The dimensions of this window are exactly the size of the original tail door glass, which makes it very easy to return the tail door to its original design if necessary.

The window is mounted in the original rubber and you don't have to adjust your tail door.

The half-drop window is not equipped with heating and the third brake light is also missing. The third brake light must be replaced by, for example, a LED brake light above the window, which is not included.

The aluminium window frame is finished with a black, high-quality industrial powder coating (RAL 9005) and is therefore insensitive to discoloration due to weather influences.

A half-drop window opens vertically from top to bottom and offers optimal ventilation across the entire width of the window and gives a pleasant flow of fresh air.

Two easily operated lock mechanisms give you the option of opening the window in various positions.

The window is equipped with 4 mm tempered safety glass, ECE 43R and DOT certified and available in the colour dark grey LT20% (80% tinted).

The half-drop window can be expanded with a window guard on the outside of the window frame or a Molle system on the inside of the window.

Installation

General

- The dimensions of the window fully correspond to the original window.
- No adjustments to the bodywork are necessary, which means that the original window can easily be replaced.
- Easy and quick to assemble.

The window is mounted in the original sealing rubber.
