Add-on: window guard for a sliding window

The window guard offers optimal protection of the glass during your off-road adventures and the sliding window can remain open for optimal ventilation, both while driving and when sleeping in the car.

Unique product features:

- Unique design, which exactly follows the contours of the window.
- Mounting on the window profile with the advantages of:
 - the bodywork is not damaged by mounting holes, which means that untreatable rust can form in the cavities of the bodywork;
 - easy to return to its original condition.

For mounting on the Explore Glazing window, use the supplied M5*12 torx security screws, so that it cannot be removed from the outside without the right tools.

For optimal burglary prevention, you can secure the window guard on the inside with M5 nuts. For this you need to use M5*16 torx screws (not included).

The window guard is made of a 3 mm aluminum plate and has the same industrial black powder coating as the Explore Glazing window. Colour RAL9005.

The window guard is not pre-assembled by us.

Installation

For mounting on the Explore Glazing window, use the supplied M5*12 torx security screws, so that it cannot be removed from outside without the right tools.

You need a mounting set, which consists of:

- drill 4.2
- drill 5.0
- tap M5
- Torx bit (tamper-resistant)

The mounting set is offered as standard with your quotation request.
