Add-on: window guard for a sliding window

Secure your Suzuki Jimny FJ with the window guard from Explore Glazing. This window guard is designed exclusively for the sliding windows of Explore Glazing, as it mounts directly onto the aluminium window profile. Protect against break-ins, shield your glass, and prioritize pet safety, all while enjoying proper ventilation.

- **Anti-Break-in:** Its robust design deters potential intruders, adding an extra security layer.
- **Glass Safeguard:** Shielding the window from bumps, scratches, and external factors ensures extended durability.
- **Pet Safety:** Pets can't protrude their heads out, reducing injury risks during travel.
- **Ventilation Retention:** Enjoy the fresh air without compromising safety.

Key Features:

- Tailored design that seamlessly fits the window's contour.
- Mounts on the window profile ensuring:
    - No damage or rust-inducing holes on the bodywork.
    - Ease of reverting to its original state.

Installation requires the included M512 torx security screws, preventing external removal. For enhanced security, fasten the guard inside using M5 nuts and M516 torx screws (not included).

Crafted from a 3mm aluminum plate, it boasts an industrial black powder coating (Colour RAL9005) matching the Explore Glazing window.

Note: The window guard is delivered unassembled.

Installation

For mounting the window guard on your Explore Glazing sliding window, use the supplied M5*12 torx security screws, so that it cannot be removed from outside without the right tools.

You need a mounting set, which consists of:

- drill 4.2
- drill 5.0
- tap M5
- Torx bit (tamper-resistant)

The mounting set is offered as standard with your quotation request.

Check out our Youtube channel for installation videos or download our installation guide.
