Toyota Land Cruiser Series 75 & 78 – door panel – Molle system (swing-out rear door, left side)

To enhance the functionality of the left rear door of your Toyota Troop Carrier, we offer a simple and effective solution. Replace the existing inner door trim with our specially designed aluminum panel, perfectly matching the size and shape of the original trim.

The aluminum panel features a mounted Molle panel that allows easy access to the inside handle (door handle). Utilize the optimized space on the door panel to attach bags, pouches, or kitchen tools using the renowned PALS webbing system.

Crafted from durable 3 mm thick aluminum, the internal Molle panel shares the same high-quality industrial powder coating as our windows and other products. It is equipped with the PALS webbing pattern, strategically designed with \varnothing 4.2 mm holes between the pattern to accommodate various systems, including Quick Fist.

Upgrade your Toyota Troop Carrier's left rear door with this practical solution, enhancing both storage options and accessibility.

Installation

The replacement aluminum door trim is specifically designed to fit the left rear door of the Troop Carrier. It is securely mounted on the tail door using blind rivet nuts. Please note that a rivet gun and rivet nuts are not included in the package.

Rest assured, all the necessary components for installation are provided. The package includes stainless steel mounting screws, cover caps, and washers to ensure a secure and seamless fit.

To complete the installation process, you will need a mounting set, which includes:

- 4.2 mm drill
- 5.0 mm drill
- M5 tap
- tamper-resistant Torx bit.

The mounting set is offered as standard in the quotation.

For detailed step-by-step instructions, please download our comprehensive installation guide. It will provide you with all the necessary information to successfully install the aluminum door trim.
