Suitable for	Toyota - Toyota Land Cruiser Series 78 Troop Carrier Toyota - Toyota Land Cruiser 70 Series Toyota - Toyota Land Cruiser Series 75 Troop Carrier

Tail door aluminum panel with integrated Molle-system - swing out type - left side

The full aluminum replacement pane perfectly matches the dimensions of the original tail door glass of your Toyota Troop Carrier, allowing for easy restoration of the tail door's original design if needed.

The aluminum pane seamlessly fits into the original rubber and requires no adjustments to your tail door. Its black, high-quality industrial powder coating (RAL 9005), shared with our other windows, ensures resistance against weather-induced discoloration.

This aluminum pane set includes:

- The aluminum replacement pane
- A Molle system panel

The Molle panel attaches directly to the aluminum pane, utilizing the space optimally for mounting bags or pouches using the renowned PALS webbing system. You have the flexibility to mount the Molle system panel on either the interior or exterior side of the pane.

Crafted from 3 mm thick aluminum, the Molle panel is coated with the same industrial powder coating as the window, featuring the PALS webbing pattern. Ø 4.2 mm holes are strategically placed within this pattern, allowing compatibility with other systems such as Quick Fist.

This multifunctional system provides both practical functionality and burglary protection.

Installation

Experience the convenience of our DIY kit, complete with all the necessary components for easy installation. The package includes stainless steel mounting screws, cover caps, and washers to ensure a seamless and secure fit.

Rest assured, our comprehensive installation guide is also provided, offering detailed step-by-step instructions to assist you throughout the installation process. Simply download the guide and follow the instructions for a hassle-free setup.
