Dimensions	Width: 690mm Height: 430mm

Suitable for

Toyota - Toyota Land Cruiser Series 78 Troop Carrier
Toyota - Toyota Land Cruiser 70 Series
Toyota - Toyota Land Cruiser Series 75 Troop Carrier

Toyota Land Cruiser Series 75 & 78 – Molle panel – halfdrop window (swing-out rear door)

A Molle panel is an essential accessory for travelers, providing efficient storage, customization, and improved safety. It maximizes space by securely attaching bags and gear, keeping items organized and accessible. Its modular design allows for flexibility, adapting to different travel scenarios. Additionally, the panel enhances safety by preventing loose objects from becoming projectiles. With quick and easy access to essentials, it streamlines travel and enhances the overall experience.

The Molle panel is mounted completely on the halfdrop window of the Toyota Land Cruiser Series 78 Troop Carrier, also known as 'Troopy,' while ensuring access to the locks. This allows for optimal utilization of the window space by attaching bags or pouches using the well-known PALS webbing system, without hindering the opening or closing of the window.

No irreversible holes are made in the rear door, ensuring that it can always be restored to its original state.

The internal Molle panel is made of 3 mm thick aluminum, finished with the same industrial powder coating as the window, and equipped with the PALS webbing pattern. ø 4.2 mm holes have been strategically designed between this pattern, allowing compatibility with other systems such as Quick Fist.

A multifunctional system that also serves as burglary protection due to its smart mounting method.

The Molle panel is mounted on the interior of the window, providing convenient storage options. Additionally, if desired, a window guard can be installed on the exterior. The window guard serves as protection against break-ins or glass impacts, enhancing security.

Installation

The package includes stainless steel mounting screws, cover caps, and washers.

To complete the installation, you will need the following mounting set:

- 4.2 mm drill
- 5.0 mm drill
- M5 tap
- Tamper-resistant torx bit

The mounting set is included as standard with your quotation request.
