Gullwing window full aluminium version

The expedition window has the same dimensions as the original side windows and can be installed quickly and easily.

An aluminium plate, equipped with two robust gas springs and two lockable compression latches, ensures a perfect seal.

The entire gullwing - the frame and the hinged part - is finished with a black, high-quality industrial powder coating (RAL 9005) and is therefore insensitive to discoloration due to weather influences.

We deliver the expedition window completely pre-assembled and ready to install!

Available for the left and right side. Windows are not interchangeable.

The expedition window can be expanded with an Explore Overlander Light.

Installation

General

- The dimensions of the windows fully correspond to the original windows.
- No adjustments to the bodywork are necessary, so that the original window can be replaced if necessary.
- Easy and quick to assemble.

The windows must be mounted with polymer adhesive. A professional polymer adhesive will be offered to you as standard.

Check out our Youtube channel for installation videos or download our installation guide:

@ExploreGlazing

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a professional company.
