Gullwing window glass version

There are several benefits to using a gullwing window on your Suzuki Jimny:

1. **Easy access to the cargo space:** A gullwing window provides easy access to the cargo area of your vehicle. The window opens upwards, allowing you to effortlessly reach your belongings without being hindered by traditional tailgates or doors. This makes loading and unloading goods much easier and simplifies the organization of the cargo space. It gives you the ability to quickly and efficiently access the items you need, making your adventures even smoother.
2. **Improved ventilation:** Opening the gullwing window allows for better ventilation in the cargo area. This is especially useful during hot days or when camping in your vehicle. It provides a fresh airflow and prevents the cargo space from becoming stuffy.
3. **Aesthetic appeal:** A gullwing window adds a unique and striking aesthetic to your vehicle. It gives your vehicle a rugged and adventurous look, setting it apart from other vehicles.
4. **Versatility:** With a gullwing window, you can use the cargo area of your vehicle in various ways. For example, it can serve as a practical workspace, a comfortable sleeping area during camping, or simply as a convenient spot to store your belongings.

In summary, a gullwing window offers convenience, ventilation, aesthetic appeal, and versatility for your vehicle. It is a valuable addition for adventurers and travelers who want to optimize their vehicle for different purposes.

This window has the same dimensions as the original side windows and can be installed quickly and easily in your Suzuki GJ (HJ/GLX).

A tempered glass plate, equipped with two robust gas springs and two lockable compression latches, ensures a perfect seal. The aluminium window frame is finished with a black, high-quality industrial powder coating (RAL 9005) and is therefore insensitive to discoloration due to weather influences.

The gullwing is completely pre-assembled and ready to be installed!

The 5 mm tempered safety glass plate, with ECE 43R and DOT certification, is available in parsol green, light transmission 57% (tinted 43%) and privacy grey, light transmission 20% (tinted 80%).

These windows are available for the left and right side and not interchangeable.

The gullwing window can be expanded with a window guard or an Explore Overlander Light.

Installation

General

- The dimensions of the windows fully correspond to the original windows of your Suzuki GJ (HJ/GLX).
- No adjustments to the bodywork are necessary, so that the original window can be replaced if necessary.
- Easy and quick to assemble.

The gullwing window must be mounted with polymer adhesive. A professional polymer adhesive will be offered to you as standard.

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a professional company.

Check out our Youtube channel for installation videos or download our installation guide.
