Convient pour	Toyota - Toyota Land Cruiser Series 78 Troop Carrier Toyota - Toyota Land Cruiser Series 75 Troop Carrier

Gullwing window full aluminium version - rear side

There are several benefits to using a gullwing window on your Toyota Troop Carrier:

1. Easy access to the cargo space:

A gullwing window provides effortless access to the vehicle's cargo area. By opening upwards, it allows you to reach your belongings without any obstructions from traditional tailgates or doors. This makes loading and unloading goods much easier and simplifies organizing the cargo space. It enables quick and efficient access to your items, enhancing your adventures.

2. Improved airflow:

While the gullwing window cannot be opened while driving, it still allows for improved airflow when the vehicle is stationary. This feature proves especially beneficial during hot days or when using the Toyota Troop Carrier for camping purposes. It helps maintain a fresh and well-ventilated cargo area, ensuring a comfortable experience.

3. Aesthetic appeal:

Adding a gullwing window gives your Toyota Troop Carrier a distinctive and eye-catching look, setting it apart from other vehicles. It enhances the rugged and adventurous appearance of your vehicle.

4. Versatility:

A gullwing window allows you to utilize the cargo area of your Toyota Troop Carrier in various ways. It can serve as a practical workspace, a comfortable sleeping area during camping, or simply a convenient spot to store your belongings.

5. Convenience:

The gullwing window offers convenience for adventurers and travelers who want to optimize their vehicle for different purposes. It provides easy access to necessary items and streamlines your overall experience.

The gullwing window for your Toyota Troop Carrier has the same dimensions as the original side windows and can be installed quickly and easily.

Note: The inner and outer bodywork of the vehicle are distinct components that are spot welded together. As a result, there may be variations in the window hole sizes, which can affect the window's fit. Therefore, it is important to align the window as precisely as possible.

Product Features:

- **Reliable sealing:** The gullwing window features an aluminum plate that is equipped with sturdy gas springs and lockable compression latches. This combination ensures a secure and perfect seal, protecting the contents of your Toyota Troop Carriers cargo area.
- **Durable powder coating:** Both the frame and hinged part of the gullwing window are meticulously finished with a high-quality black industrial powder coating (RAL 9005). This coating not only enhances the window's aesthetic appeal but also provides exceptional resistance to discoloration caused by various weather conditions.
- **Convenient installation:** We prioritize your convenience, which is why we deliver the gullwing window fully pre-assembled and ready for installation. With this hassle-free setup, you can quickly and easily install the gullwing window onto your Toyota Troop Carrier, saving you time and effort.

The gullwing window can be expanded with the drop down table Explore Overlander Light.

Installation

General

- The dimensions of the window fully correspond to the original window.
- The flange of the body is slightly curved. For an optimal fit of the new Explore Glazing window, this flange must be made flat.
- The inner and outer bodywork are two separate parts and are spot welded. This can cause differences in the hole size of the windows, which can influence the fit of the windows. You should therefore center the window as accurately as possible.
- Easy and quick to assemble.

The gullwing window is mounted with EPDM foam rubber, M4*20 stainless steel mounting screws and sealed with adhesive.

For an additional charge, the stainless steel mounting screws can be supplied black powder coated. This option is offered to you as standard.

A mounting set will be offered with your request and consists of:

- drill 4.2 mm
- cartridge of professional caulking compound
- brush
- rubber to remove the excess sealant

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a professional company.
