Gullwing window glass version - front side

Utilizing a gullwing window on your Toyota Troop Carrier offers a range of advantages.

Firstly, it provides easy access to the cargo area, allowing for effortless loading and unloading of goods without obstruction from traditional tailgates or doors. This convenient feature simplifies organization and enhances the efficiency of accessing your items during your adventures.

Additionally, the gullwing window improves airflow when the vehicle is stationary. While it cannot be opened while driving, it allows for increased ventilation during hot days or while using the Toyota Troop Carrier for camping purposes. This ensures a fresh and well-ventilated cargo space, enhancing comfort during your travels.

Furthermore, adding a gullwing window enhances the overall aesthetic appeal of your Toyota Troop Carrier. It gives the vehicle a distinctive and eye-catching look, setting it apart from others on the road. This feature contributes to the rugged and adventurous appearance of your vehicle, adding a touch of style.

The versatility of the gullwing window is another notable benefit. It enables you to utilize the cargo area in various ways, serving as a practical workspace, a comfortable sleeping area during camping trips, or simply a convenient spot to store your belongings. This flexibility adds value to your Toyota Troop Carrier, allowing you to adapt it to different purposes as needed.

In terms of convenience, the gullwing window is particularly advantageous for adventurers and travelers. It ensures easy access to necessary items, streamlining your overall experience. Whether you're on a road trip, exploring off-road terrains, or embarking on outdoor adventures, the gullwing window enhances the functionality and usability of your Toyota Troop Carrier.

It's important to note that due to the separate inner and outer bodywork being spot welded together, there may be variations in the window hole sizes, potentially affecting the window's fit. Therefore, precise alignment is crucial to ensure a proper installation. Explore Glazing offers a gullwing window designed to match the original side windows of your Toyota Troop Carrier, providing a quick and easy installation process.

Experience the numerous benefits of a gullwing window on your Toyota Troop Carrier, brought to you by Explore Glazing. Enjoy effortless access, improved airflow, aesthetic appeal, versatility, and convenience, while ensuring the precise alignment of your window for optimal performance.

Product Features:

- **Secure sealing:** The gullwing window features a tempered glass plate, ensuring durability and safety. Equipped with two robust gas springs and two lockable compression latches, it guarantees a secure and perfect seal, protecting the contents of your Troop's cargo area.
- **Weather-resistant frame:** The window frame is constructed from high-quality aluminum and finished with a black industrial powder coating (RAL 9005). This coating provides excellent resistance against discoloration caused by various weather influences, ensuring the window maintains its aesthetic appeal over time.
- **Easy installation:** The gullwing window comes fully pre-assembled and ready for installation. This saves you time and effort, allowing for a convenient and hassle-free setup.
- **Tempered safety glass:** The 5 mm tempered safety glass plate used in the window is certified with ECE 43R and DOT, ensuring compliance with safety regulations. It is available in privacy grey with a light transmission of 20% (tinted 80%).

The gullwing window can be expanded with a window guard and a drop down table Explore Overlander Light.

Installation

General

- The dimensions of the window fully correspond to the original window.
- The flange of the body is slightly curved. For an optimal fit of the new Explore Glazing window, this flange must be made flat.
- The inner and outer bodywork are two separate parts and are spot welded. This can cause differences in the hole size of the windows, which can influence the fit of the windows. You should therefore center the window as accurately as possible.
- Easy and quick to assemble.

The gullwing window is mounted with EPDM foam rubber, M4*20 stainless steel mounting screws and sealed with adhesive.

For an additional charge, the stainless steel mounting screws can be supplied black powder coated. This option is offered to you as standard.

A mounting set will be offered with your request and consists of:

- drill 4.2 mm
- cartridge of professional caulking compound
- brush
- rubber to remove the excess sealant

It is important that the Explore Glazing products are assembled correctly and safely. Careless assembly can lead to accidents and serious damage and / or injury to you or others. If you have no technical experience or are not familiar with the general assembly instructions, we recommend that you have our products assembled by a professional company.
