Tail door halfdrop window - swing out type - right side

Experience the perfect combination of functionality and design with the Explore Glazing half-drop window for the Toyota Troop Carrier and Toyota 70-series tail door (swing-out type). This exceptional window option not only matches the dimensions of the original tail door glass, allowing for seamless restoration if needed, but also eliminates the hassle of adjusting the tail door thanks to its installation in the original rubber.

While providing exceptional ventilation, please note that the half-drop window does not include a heating function, focusing solely on delivering a refreshing flow of fresh air during your journeys. Its vertical operation from top to bottom ensures optimal airflow across the entire width of the window, creating a comfortable and enjoyable driving experience.

Crafted with durability in mind, the aluminum window frame is coated with a high-quality black industrial powder coating (RAL 9005). This protective coating ensures long-lasting resilience against discoloration caused by various weather conditions, maintaining its sleek appearance for years to come.

Convenience is key, and the Explore Glazing half-drop window features two user-friendly closures that offer flexibility in opening the window to different positions, allowing you to customize the airflow according to your preferences.

Safety is paramount, and this window is equipped with 4 mm tempered safety glass certified by ECE 43R and DOT. The dark grey LT20% color (80% tinted) adds a touch of style while maintaining excellent visibility and protection.

To further enhance its functionality, the half-drop window can be complemented with an external window guard for added protection or an internal Molle system for organized storage, providing you with versatile solutions tailored to your specific needs.

Installation

General

- The dimensions of the window fully correspond to the original window of your Toyota Troop Carrier or Toyota 70-series tail door (swing-out type).
- No adjustments to the bodywork are necessary, which means that the original window can easily be replaced.
- Easy and quick to assemble.

The window is mounted in the original sealing rubber.

You can download a removal and installation instruction from the workshop manual under 'prices and guides'.
